Workers' Compensation

“Your Caring Professionals”

**Case Management
&
Cost Containment Services**

Employers spend billions of dollars in workers' compensation costs, time away from work, lost production and on medical care each year. Employers benefit from case management services through an expedited return-to-work timeline and consistent information flow.

The use of a case manager controls costs while ensuring the employee can return to work in a shorter time frame without jeopardizing their safety.

OCS is currently contracted with the U.S. Department of Labor - Office of Worker's Compensation.

We are also an approved Vocational Rehabilitation facility through the State of Michigan.

OCS CASE MANAGERS:

- Obtain timely, optimal treatment for the injured/ill worker so they will be able to RTW as quickly as possible
- Provide an axis for communication between the injured worker, providers, the employer and the insurance company to ensure quality patient care
- Insure that efficient services are provided to all parties involved
- Develop, implement and monitor individual rehabilitation plans to maximize savings for the employer and insurance carrier by minimizing lost time and maintaining productivity

OCS is dedicated to helping businesses and their employees **prevent injury** and reoccurrence through health & safety evaluations, training programs, job site analysis & ergonomics assessment as well as adaptive equipment/assistive technology assessments.

- **Free Health and Safety Trainings/Presentations for:** Employers, Employees and Adjusters
- **Injury Prevention Program:** Identify problem areas conducive to producing injuries and repetitive conditions
- **Job Site & Ergonomics Analysis:** Evaluate the employee's work area to determine if any modifications of the work station can be made to accommodate the injured worker's medical restrictions to allow for a successful RTW
- **Adaptive Equipment/Assistive Technology Assessment:** Identifies technologies that can improve performance, access, participation, and independence of individuals. They are assisted in the selection, acquisition and use of an assistive technology device
